REGULATORS

When your regulator is due a changeout after
5 years of service, why should you choose GasArc?

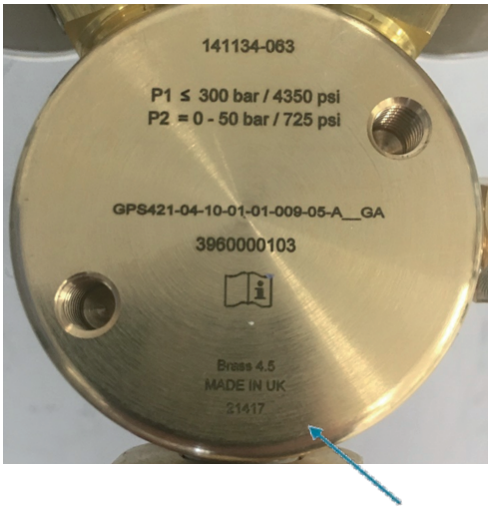

UK-manufactured regulators designed for precision, safety, and reliability .

We deliver uncompromising control across a wide range of industrial, laboratory, and specialty gas applications.
Designed and manufactured in the UK, our range of regulators ensure stable pressure, exceptional purity, and long-term performance - even in the most demanding enviroments.

How to know if your regulator needs replacing?

All of our regulators are marked with a Julian date to mark the date the regulator is manufactured - Any regulators that have an older date of **00121** are required to be replaced in 2026 .

OUR REGULATOR RANGE:

>	TECH MASTER GPT400	Up to 4.5 purity (99.995%), ideal for technical gases.
>	LAB MASTER LGT500	Up to 5.0 purity (99.999%), for high-purity control.
>	SPEC MASTER HPT600	Up to 6.0 purity (99.9999%), for ultra-pure applications.
>	CHEM MASTER SGT600	Up to 6.0 purity (99.9999%), built for corrosive, toxic, and high-purity gases.

Is your existing regulator in date, maintained and safe for use? Inline with UK Guidance and recognised by leading insurers, let us help you by keeping you compliant.
